

User Flows

Student OS Documentation — File 07

Onboarding

Open app → register/login → complete profile → land on Home → optionally add timetable/tasks → receive first dashboard summary.

Daily Flow

Login → Home → see next class → open Today → attend class → later complete task → dashboard updates.

Task Flow

Tasks → Add Task → enter details → validate → save → task appears in Tasks + Calendar + Home → reminder → complete → statistics update.

Exam Flow

Exams → Add/View Exam → exam appears in Exams + Calendar + Home → preparation progress updated → reminder → exam passes → status becomes completed/past.

Attendance Flow

Attendance → select subject → view percentage/target → inspect warning → optionally review attendance history.

Notes Flow

Notes → subject → create note → save → search/open/edit → optional future AI summary.

Notification Flow

Event/task/exam created → reminder rule evaluated → notification scheduled → notification delivered/displayed → user opens related item → read state updates.

Settings Flow

Settings → category → change preference → validate → save → confirmation → preference affects relevant behavior.

Error Flow

Action → validation/API failure → show understandable error → preserve user-entered data where possible → retry/cancel.
