

Student OS Documentation Package

Student OS Documentation — File INDEX

Documentation Package

01_PRD.pdf was created in the previous step and should be kept with this package.

02_SRS.pdf through 17_OPEN_SOURCE.pdf are included in this package.

README.pdf is the project-level documentation guide.

Recommended AI workflow

Give the complete documentation folder to the coding agent.

Ask the agent to read all documents before implementation.

Implement one roadmap phase at a time.

After each phase, run tests/build/lint and fix errors.

Do not invent missing requirements; update documentation when a requirement changes.
